Product Fronting at it's Best

SPOS has been working on developing this latest iteration of our most successful product pushing solution. The VersaPusherPro2.0 has been designed to push more products, in more categories, and to provide a reliable solution for a multitude of package sizes, shapes, and weights.

Throughout this presentation you will be able to see first hand the benefits of the latest iteration of this great product, and how they will help to better drive sales in your store or category.

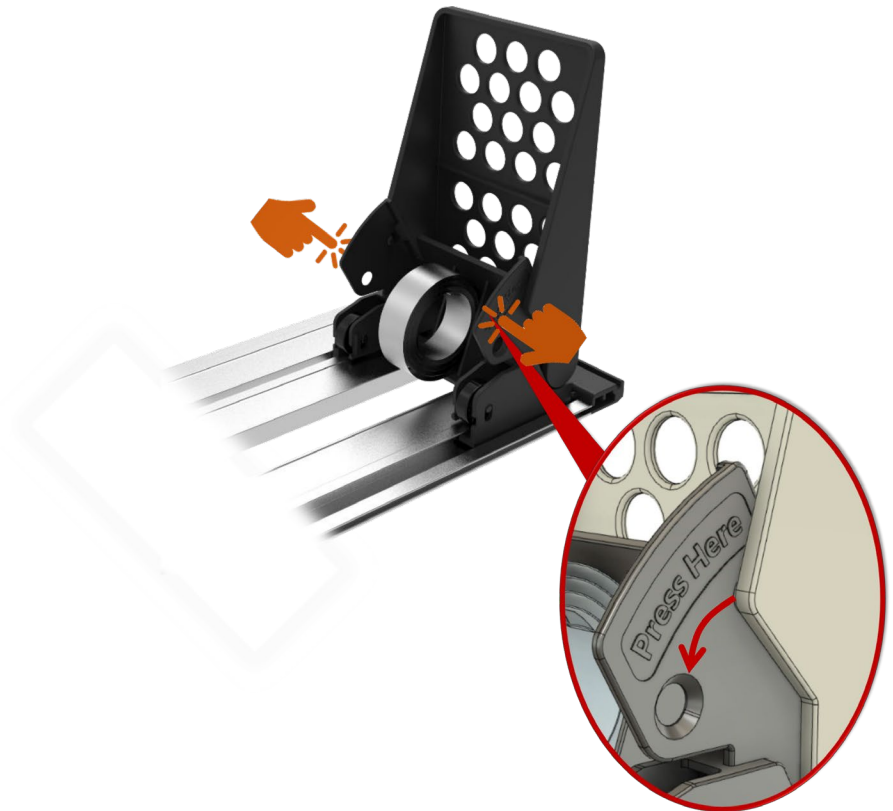

These include:

- Adjustable Paddle Angle
- Wide array of dividers
- Increased sizes available for different sized shelves
- The same great fronting performance

Adjustable Angle

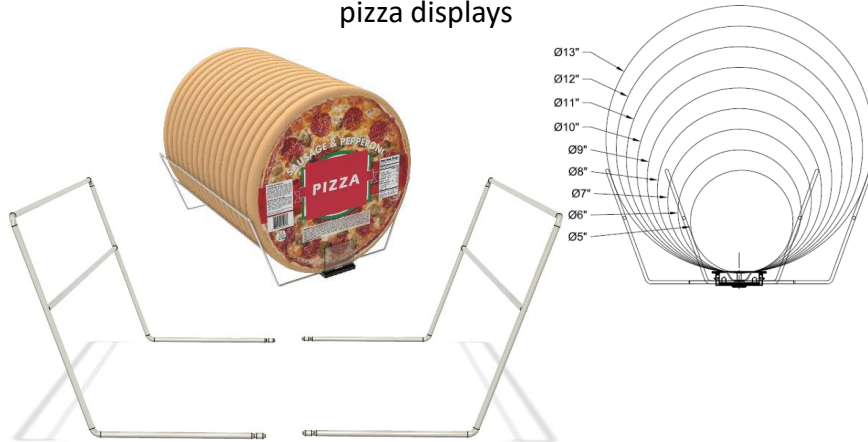

The newly designed paddles can be adjusted flat, or back to a 30 degree angle for larger or troublesome packaging. This allows the **VersaPro2.0** system to front more product ranges, and more effectively.

Wide Array of Dividers

Wide wire dividers for Pizzas

These dividers are excellent at creating rows of fresh pizza displays

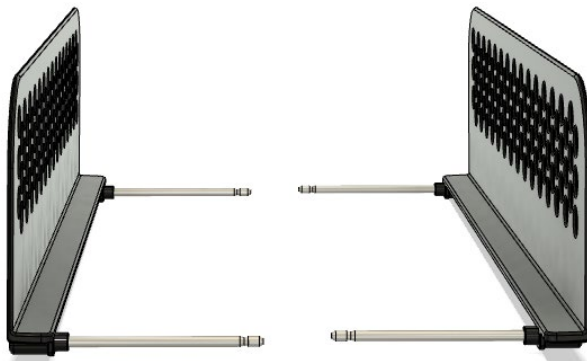

Wire dividers for Other Larger Goods

Stainless Steel, good for multiple products/environments.

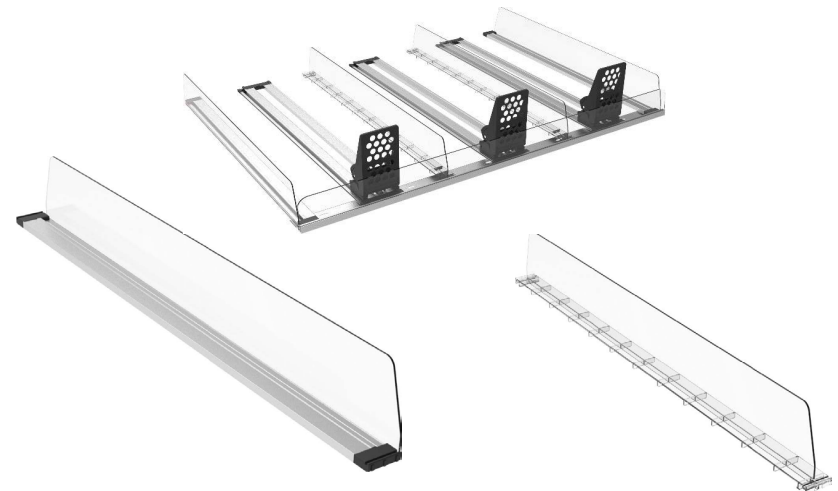

Plastic dividers

Injection dividers

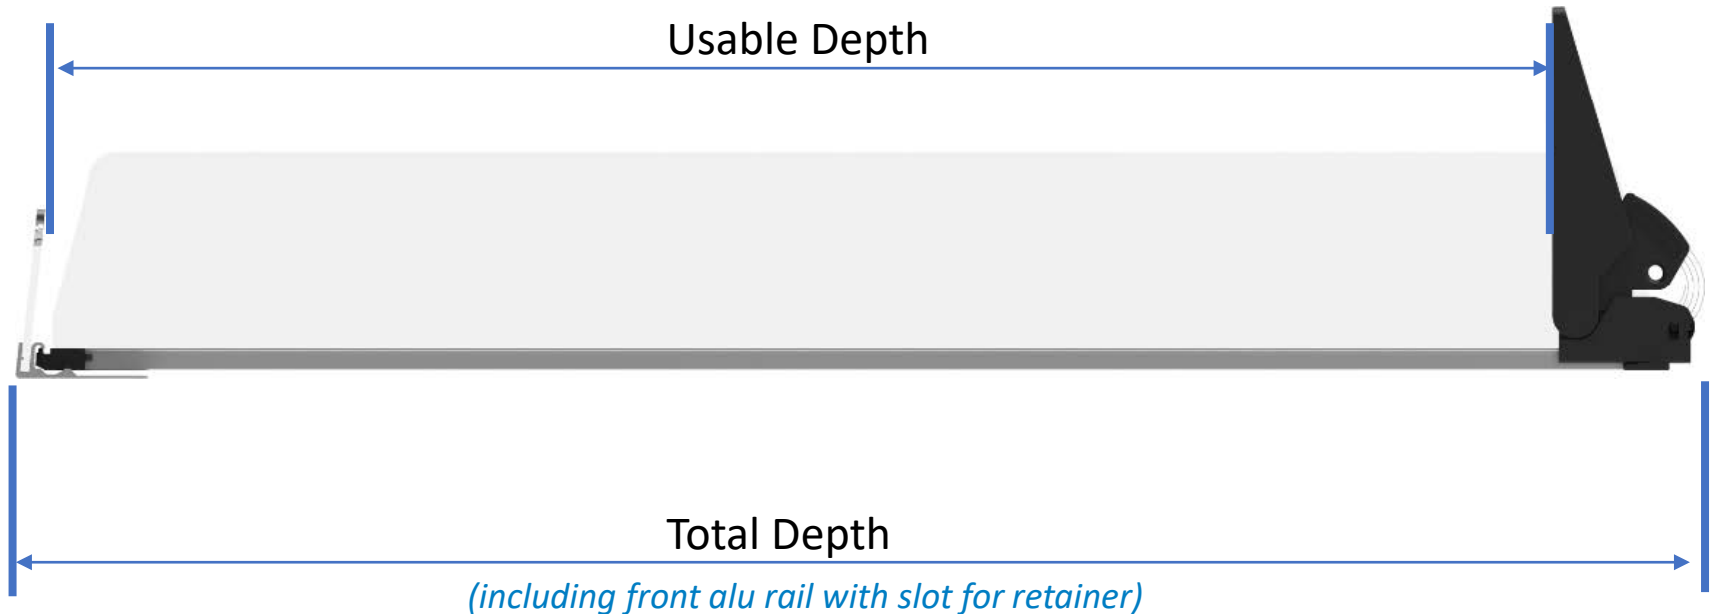

Easily adjust width of each facing along a front rail.

New Sizing to allow Optimal Stocking

The new system can be made in a wide variety of depths, to suit many different shelving systems. It can even be produced at a custom depth.

TOTAL Depth	14" (356mm)	16" (407mm)	18" (458mm)	20" (508mm)	22" (559mm)	24" (610mm)	26" (661mm)
Usable depth	12" (309mm)	14" (359.8mm)	16" (410.6mm)	18" (461.4mm)	20" (512.2mm)	22" (563mm)	24" (613.8mm)
